

Construction Milestone Capture Form

This form is used to capture dates in your construction plan so that we can perform inspections at the correct point in development, and is applicable for housing developments only.

We appreciate that these dates may change but request you please use the most accurate dates available, according to your plan. In the event these dates change, please contact Scottish Water to rearrange any inspection accordingly.

At this stage, you will have completed an application (WF1/SF1), this form needs to be returned to Scottish Water with a signed Financial Reimbursement Agreement prior to construction taking place as set out in Scottish Waters Vesting Policy.

Previous application forms include:

Construction Milestone Capture Form

When completing this form please refer to the guidance section for assistance.

We appreciate that you may possess limited information and therefore our mandatory information fields are limited. The more detailed information which can be included on this application form, will ensure that we can schedule site inspections during construction at the appropriate times for your development.

Construction Milestone Capture Form

1 Application Details

1.1 Please include any Scottish Water reference number you may have had previously relating to this development.

1.2 The applicant will be the designated point of contact and will receive all correspondence from Scottish Water relating to this enquiry unless otherwise stated.

1.3 Please only complete the developer section where the applicant is not the developer.

Construction Milestone Capture Form

2. Site Details

- 2.1 Site address: * _____

- 2.2 Nearest Postcode: * _____
- 2.3 Ordnance Survey Ref (12 Fig):

3. Planned Construction Dates

- 3.1 Planned Start Date: * _____
- 3.2 Planned Site Completion Date: * _____
- 3.3 Planned Date for First Connection: * _____
- 3.4 Planned Date for First Occupancy: * _____

4. Site Inspections During Construction

As part of the new facilitation process launched on April the 1st 2017, Scottish Water now conducts mandatory site inspections during construction on key infrastructure.

These are visual inspections carried out by Scottish Water Field Service Advisors to ensure that assets are constructed to Scottish Water's standards and specifications. Therefore, all assets must be clearly visible and not covered or backfilled until the Site Inspection During Construction has been carried out.

At this time, Site Inspections During Construction are Asset specific – applicable to SUDS, pumping stations, water booster stations and spine infrastructure.

Please complete each section below for each asset type that is part of your application. If a section is not relevant to the development, please show N/A in place of a Planned Date for Inspections detailed in points 4.1 to 4.5.

4.1 Water Spine

We need to inspect water spine infrastructure at the point that the features below are constructed and available for assessment.

- Infrastructure has been laid and prior to any tie-ins or service connections being made.

Planned date for water spine inspection: * _____

2 Development Details

- 2.1 If you do not have a full postal address please provide as much location information as possible e.g. name of an adjacent road.
- 2.2 Please provide nearest postcode.
- 2.3 If available, please include a 12 digit Ordnance Survey reference number.

- 4.1 Multiple Assets – Should your development have more than one of a certain asset type, you are required to include the date for inspection for each individual asset.

We understand the dates you provide may change but request that you provide us with the best proposed dates you can for each asset type.

Construction Milestone Capture Form

4.2 Foul Spine

We need to inspect foul spine infrastructure at the point that the features below are constructed and available for assessment.

- Infrastructure has been laid including partially or completed manholes and track remains open.

Planned date when features will be ready for first inspection: * _____

4.3 Sustainable Urban Drainage System (SUDS):

We need to inspect a SUDS at the point that all the features are constructed and available for assessment.

4.3.1 Please specify the type of SUDS to be used by ticking the appropriate box*:

Pond Basin Underground storage

4.3.2 SUDS features requiring inspection:

- When the major part of excavation works to create the feature has been completed and construction of headwalls and flow control is ongoing.
- When major construction is coming to an end and the site layout is nearing completion.

Planned date when features will be ready for first inspection: * _____

4.4 Waste Water Pumping Station inspection:

We need to inspect a waste water pumping station at the point that all the features below are constructed and available for assessment.

4.4.1 Waste water pumping station features requiring inspection:

- When wet well construction has been completed.
- When major electrical and mechanical components have been installed.
- When major construction is coming to an end and the site layout is nearing completion.

Planned date when features will be ready for first inspection: * _____

4.5 Water Booster Station inspection:

We need to inspect a water booster station at the point that the features below are constructed and available for assessment.

4.5.1 Water Booster Station features requiring inspection:

- When major electrical and mechanical components have been installed.
- When major construction is coming to an end and the site layout is nearing completion.

Planned date when features will be ready for first inspection: * _____

Please note: Scottish Water will schedule Site Inspections During Construction based on the dates provided in points 4.1 to 4.5.
